## EXPERIENCES

### Website Development

Protege at Telekom Malaysia | March 2022 - present

#### 1. Project: New Hire Form in TM Career

- Duration: April 2022 - present
- Used TS, CSS and HTML to create the page to be fully functional and responsive, aligned with the requirements from clients.
- Entrusted to individually handle creating the webpage design and functionality to satisfy the client's requirements.
- Drag and drop file uploader for single and multiple files and send straight to API service.
- Teamed up with backend team to ensure objects and data required from backend are successfully passed.
- Maintaining and debugging the webpage to ensure more user experience.

#### 2. Project: Individual Development Program(IDP) in ERA website

- Duration: May 2022 - present
- Applied TS/JS, CSS and HTML knowledge in helping creating IDP page for project ERA.
- Developed different IDP interface and functionality for employee side and admin side.
- Convert user inputs in IDP to a PDF file that can be downloaded and viewed by using pdfmake in typescript.
- Developed the fully functional and responsive IDP form for users to select and view mentor.
- Debugged and maintained the webpage from fixing small bug issues to creating a new logic to help tackle some hard requirements from the clients.

## SKILLS

- Frontend: JS/TS, HTML, CSS, Node.js, git
- Framework: React and Angular (Prefer Angular)
- Dedicated team member
- Leadership and teamwork skill
- Analytical and logical thinking set

## EDUCATIONAL HISTORY

### Universiti Teknikal Malaysia Melaka

Bachelor in Mechanical Engineering | Feb 2018 – Jan 2021

• CGPA: 3.56

### Universiti Teknikal Malaysia Melaka

Diploma in Mechanical Engineering | June 2015 – Jan 2018

• CGPA: 3.67

### SMK USJ 12

Science stream + ICT | 2013 - 2014

• SPM: 9A's
